2. Reason

The Company recognizes that the stable, continued return of profits to our shareholders over the long term will lead to an increase in shareholder value. Our basic policy regarding profit distribution is to improve shareholder value through reinvestment of profits from a medium- to long-term perspective and directly return profits to shareholders through dividends, etc., from a comprehensive perspective. Regarding the use of retained earnings, in order to secure future shareholder returns, we aim to maximize corporate value by making strategic investments for sustainable growth, while at the same time allocating management resources with greater awareness of capital cost and return on invested capital, thereby achieving further sustainable growth and enhancement of corporate value.

Based on the above basic policy, the interim dividend for the current fiscal year has been set at 25.00 yen per share, in line with the most recent dividend forecast.
